AWD655 Instruments Washer Disinfector

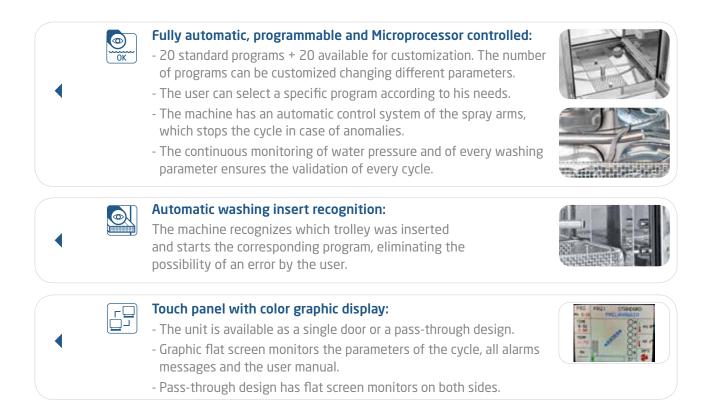

AWD655 AT-OS instruments washer disinfector

AT-OS instruments washer disinfectors have been developed to meet hygiene standards: ISO Standard EN-ISO 15883-1/2.

As a result of using the highest technologies, the AWD655 are developed to offer different models, suitable for the huge variety of instruments found in hospital departments, dental clinics, surgical and central sterilization rooms, satisfying all kinds of medical requests.

The large choice of washing baskets allows the washing, disinfection and drying of the most sophisticated instruments, such as the tubular ones.

AWD - AUTOMATIC LOADING/UNLOADING SYSTEM

AUTOMATIC LOADING/UNLOADING SYSTEM

System for big sterilization departments, that allows the automation of loading and unloading operations.

The loading and unloading operations are easy and intuitive: the washing trolley is automatically transported in front of the door, which, if the device is free, automatically opens. The trolley is shoved all the way in the washing chamber, the door closes and the specific cycle for the inserted trolley starts.

When the cycle is complete, the unloading door opens and, if the unloading system is free, the trolley is transported on it. The system is modular, to adapt to every kind of department configuration, and can house 2 or more trolleys both on the loading and on the unloading zone. If that is the case, of course, a controller takes care of avoiding any kind of impact between trolleys.

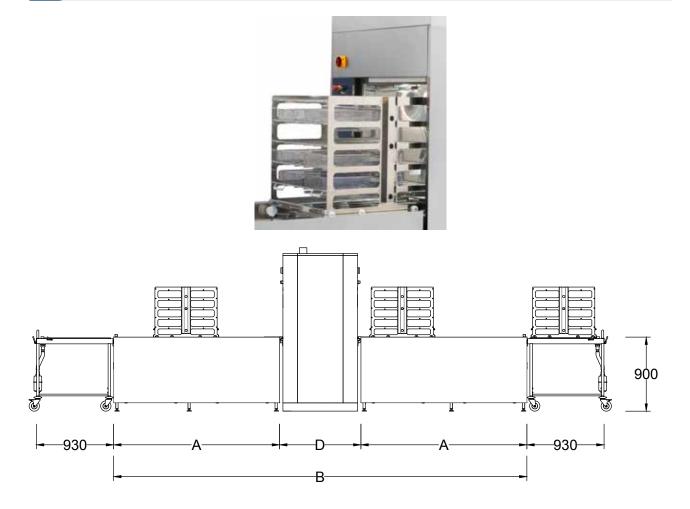

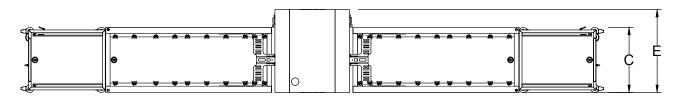

Compatible with AWD-655-15 Compatible with AWD-655-10A Modular system, which can house 1, 2 or 3 inserts, both in the loading and the unloading zone.

AUTOMATIC LOADING/UNLOADING SYSTEM
